This Article is brought to you for free and open access by the Journals at University of Minnesota Morris Digital Well. It has been accepted for inclusion in Journal of the Minnesota Academy of Science by an authorized editor of University of Minnesota Morris Digital Well. For more information, please contact skulann@morris.umn.edu.

Notice to Contributors of Articles

Persons submitting papers for publication in the *Journal* are asked to prepare material in accordance with style and format preferences of this publication. The Academy is aware that some of these requirements differ from the style of other publications, but co-operation of authors is necessary to achieve economy and efficiency under the *Journal's* printing process.

Publication policy

Membership in the Minnesota Academy of Science is a desirable but not necessary condition of publication in the *Journal*. All papers by residents of Minnesota, staff and students of Minnesota high schools, colleges and universities, that meet the editorial criteria of the Academy will be considered for publication. Papers are accepted with the understanding that they have not been published, submitted, or accepted for publication elsewhere. Short reports of work published elsewhere are welcomed, however, providing copyrights are not infringed.

Submission Requirements

Two copies of each paper, one on bond paper, and typed double-space throughout. Only one copy is needed of photographs or illustrations that are separate from the manuscript.

An abstract and biographical identification of the author or authors with each paper.

Photographs, in black and white, glossy finish. Charts and graphs should be done in simple, heavy lines with minimal lettering. (The editors reserve the right to select illustrations and limit photos and charts to no more than a total of four with any single article.)

Length

The *Journal* strives for average length of 2,500 to 3,000 words in order to accommodate more articles. Shorter items are preferred.

Subheadings

Include substantive meaning in subheadings. Do not use general words such as "introduction", "method", "discussion,"/or "conclusion."

References and symbols

Do not use footnote numbers or asterisks in the text or footnote material at the bottom of manuscript pages. Do not use symbols, Latin or Greek letters, etc. Write out in English words "gamma", "infinity", "pi", "square root" and similar terms.

A reference list at the end of an article should include material that might be of interest and reasonably available to the average lay reader who wishes to delve further into a subject rather than citations for numerous parts of the presentation or a compilation of the author's entire research.

If material is a digest of the author's own degree thesis, it may be so stated in the abstract and manuscript itself, but do not list your own thesis as a reference for your own paper.

Use the following form, with author's last name first, capitalized, and arranged alphabetically.

Book: ANDOVER, P. 1961. *A Study of New Rocks*. Boston, Provincial Press.

Chapter: EXETER, C., and ANDOVER, P. 1961. Vermont, Grantite. In Andover, P., Editor.

A Study of New England Rocks. Boston

Publications: ANDOVER, P. and EXETER, C. 1973, Notes on New England Rocks. Geol. 34:3. (No page numbers, please).

Proofs and additional copies

Authors will receive one set of galley proofs for checking and corrections. Proof changes should be limited mainly to noting typographical errors or essential time-element and spelling changes. The editors reserve the right to bill authors for excessive adjustments or for introduction of new material at the proof stage.

Along with proofs, authors will receive a form for requesting additional copies of the *Journal*.

Journal articles, including those from past issues, also are available through the Xerox-University Microfilm Service, Inc. after publication.

PROPER MAILING ADDRESS REQUIRED

A current and complete mailing address with zip code must be included with papers submitted for possible publication in the *Journal* of the Minnesota Academy of Science. The name of an institution or name of place where paper was presented is not an adequate mailing address for correspondence regarding submitted papers.

Supporting Contributors

Contributions from businesses, scientific and academic organizations, foundations, institutions and individuals provide essential support to the Minnesota Academy of Science beyond the dues of members. Their contributions, which are tax-deductible, may be made as annual donations or as stipends for specific projects, memorials or other Academy purposes. Present contributors are:

Cargill Foundation
Chem/Serv, Inc.
Duluth Missabe and Iron Range Railway
Economics Laboratory, Inc.
Erie Mining Company
Ford Motor Company
General Mills Foundation
Graphics, Inc.
Green Giant Company
Honeywell, Inc.
Minnesota Mining and Manufacturing Company
Minnesota Mutual Life Insurance Company
Northern Natural Gas Co.
Northern States Power Company
Northwestern Bell Telephone Company
Northwestern National Life Insurance Company
Ottetail Power Company
Lewis and Annie F. Paper Foundation
The Peavey Company
Pentair Industries, Inc.
Pillsbury Company Foundation
Univac-Sperry Rand Foundation

Support for Special Projects
